

Turkey – security concerns World Super Seniors

The Executive has expressed concerns to the ITF about the security situation in Turkey, where the World Super Seniors Titles are scheduled to be held in October.

The response we have received from the ITF reads as follows: “I can inform you that we are about to undertake a thorough security review, in collaboration with a specialist company, and if as a result of that exercise it is determined that our events cannot or should not take place as planned or that additional security measures are required then we will be sure to follow up as required including communicating with all interested parties”. We will obviously update players as soon as any further information is received from the ITF, or from TA whom we have also approached for their official view.

If necessary, we will extend the nomination closing date beyond 1st April.
